# John Bunyan Geography Overview

	Describe and understand key aspects of human and physical features using maps.	Egypt influenced where people settled, using maps, atlases, globes and digital mapping to locate Egypt and identify its key human and physical geographical features.	and beyond, using maps and fieldwork to understand human and physical features and how places are similar and different.
Year 4	How did the Romans expand across Europe and Britain, and how can maps show their origins, settlements, and impact on places like the UK over time?	How does South America's climate and environment affect rainforest life and chocolate production, and how is it different from other places?	How did Anglo-Saxon settlements depend on the land and environment, and how has the landscape—such as at places like Abberton Reservoir—change over time?
Year 5	How do Geographical features influence where theme parks are located, and how can maps help us understand these choices?	How did the Maya use their environment to live and trade, and how does their use of land and settlement compare with the UK?	How did the Vikings use land, resources, and settlements in Britain, and how can we use maps and local evidence to understand where and why they settled?
Year 6	How did the locations and characteristics of European countries influence Britain's decisions and involvement in World War II?	What causes volcanoes, earthquakes, and tsunamis, and how do they affect people and places around the world?	How has Ancient Greece shaped the modern world, and what can maps, myths, and the Olympics tell us about its places, culture, and legacy today?
